Setting the time and date

Pos. I Position of rest (watch running)

Pos. II Quick-change correction for date

Blocking time for the quick-change day correction is from approx. 9.30 pm and midnight.

- Pull the crown out to position II (watch still running).
- Turn the crown until the current date appears.
- Push the crown back into position I.

Pos. III Setting the time

- Pull the crown out to position III (watch stopped).
- Turn the crown, until the current time is displayed (remember the 24-hour cycle).
- Push the crown back into position I.

Strap fitting/options

The MX10 models can be fitted with a polymer strap or a stainless steel bracelet.

With a 18mm lug width and 18mm spring bar fixing, straps are easily interchangeable using a forked spring bar tool.

The MX10 straps exclusively available through nitewatches.com can be found here:

<https://www.nitewatches.com/store/gb/straps/mx10>

The stainless-steel bracelet can be adjusted in length by adding or removing links and by also using the 3-micro adjustment on the buckle part of the strap.

If you have any questions about the MX10 series then please email us on sales@nitewatches.com.
